CHANGUBE COPPER PROJECT FOR JOINT VENTURE

Item	Remarks
Project Name	Changube Copper Project.
Project Location	Kiruru-Ibweijewa Village, Lembeni Ward in Mwanza District, Kilimanjaro Region.
Project Short Description:	The project will involve mining of copper and refining it Ore reserve have been estimated at 5Million tons at a grade of 3%CU and 3g/t gold Resource Verification is required, thus to conduct a resource drilling program to develop geological models and re-estimate the resources.
Project Benefits:	<ul style="list-style-type: none"> i. Promote growth of copper processing industry in Tanzania; ii. Lessen dependence on external sources for importation of produced or processed copper; iii. Encourage local markets for locally processed copper; iv. Promote export market for locally produced copper; v. Promote brand and quality of locally produced copper; vi. Promote growth and expansion of foreign direct investment; vii. Creation of employment opportunities to un skilled and professionals; viii. Social benefit for the community surrounding the project includes; water, health and school services.
Project Cost Estimates:	<p>As per Feasibility Study Report of 2010 the total estimated costs for the project are USD 32.3 million whereby geological exploration works estimated to USD 3 million.</p> <p>For Copper refining industry need feasibility study in order to develop the industry.</p>
Project Status:	Ongoing small scale activities around the area.
Proposed Financing Mode:	Equity and Loan.
Available information	Feasibility Study Report of August 2010.

KIWIRA COAL MINE AND 200MW POWER PROJECT FOR JOINT VENTURE PARTNERSHIP

Item	Remarks
Project Name Project Location	Kiwira Coal Mine and 200mw Power Project. Ileje District – Songwe Region, Southern Highlands of Tanzania.
Project Short Description:	Current resources is more than 300 Million Tonnes of coal resource. Project has four phases. i. Expansion of the existing underground mine. ii. Establishment of an open pit mine at capacity of 1.2 Mtpa. iii. Construction and installation of 200MW power plant; and iv. Construction of a Transmission Line (100km 400kV) from the Mine to national grid substation in Mbeya.
Project Benefits:	i. Optimization of available coal resources in the Ivogo and Kabulo ridges within the Kiwira Coalfields for coal selling and generate electricity. ii. Diversification of sources of energy by creating a good energy mix to reduce dependence on weather-prone hydro power generation. iii. Social benefit for the community surrounding the project includes; water, health and school services.
Project Cost Estimates:	Total Cost is estimated to be USD 480 Million.
Project Status:	Currently there is coal mining operations at medium scale for supplying to local industries at Kabulo.
Proposed Financing Mode:	Equity and Loan.
Available information	Feasibility Study Report on 200 MW Coal Fired IPP Project.

16	R 17362/2022	30% STAMICO	Mwaga, Kilimanjaro, North and West	Copper	912 ha	Feasibility study in place. Feasibility study completed and SPA signed in August 2022. Mining rights granted in full process of EIS/ES and EIA/ESIA application. Requires Feasibility Study, EIS/ES and EIA/ESIA study, ESIA/ESIA study and drilling to establish the economic reserves.

BRIQUETTES SUPPLY

Item	Remarks
Product name	Rafiki Briquettes.
Product Production Region	Dar Es salaam, Tanzania.
Product Availability	All over the world.
Product Descriptions	Rafiki Briquette is smokeless coal briquettes made from coal dust mixed with other material with the following characteristic: <ul style="list-style-type: none"> i. Easy to ignite. ii. Odorlessness. iii. Strong Flame. iv. No ash. v. No poisonous gas to man and animals.
Product use	I. Cooking. II. Barbeque. III. House warm.
Product Benefit	<ul style="list-style-type: none"> i. Provision of affordable and environmentally friendly cooking energy to the society. ii. Support Global efforts on environmental conservation by providing alternative cooking energy which does not involve deforestation.
